Questions have arisen from some of our passengers about seat belts on the Link Express.

When these buses were purchased, the bus manufacturer did not offer seatbelts as standard equipment on these vehicles nor were seatbelts available as an option on these vehicles. The bus manufacturer has recently developed a seatbelt prototype that is currently being tested for installation on their vehicles.

Once that prototype has been fully tested and is made available to CCTA and GMTA, we will look to add that equipment to our Link buses, as the safety of our passengers is the first priority of CCTA and GMTA.

Chris Cole, General Manager
